

S'MESH PLASTIC CHAIR REMOVABLE TABLET ATTACHED TO ARM

Design Alberto Basaglia Natalia Rota Nodari

When we were designing S'mesh we thought about the individual occasions when we spend time sitting: in the office, in waiting rooms, during conferences. S'mesh was designed to provide the ultimate comfort and a high level of industrialization. This product is assembled without screws and features a patented interlocking system, which keeps costs down and facilitates disposal at the end of product life. The perimeter structure is made of steel rod, the seat and the backrest are made of polypropylene and come in white, black and grey. The backrest mesh is available in black, white, grey and on request also green, red, blue and beige.
