

CORNETTO Design Alberto Basaglia Natalia Rota Nodari

Design patent. Cornetto is a new system with epoxy-coated frame that gives coat stands and furnishing accessories a new ironic and original touch. The wall-mounted coat rack takes up very little space and allows for up to three garments to be hung. The coat stand, featuring nine pegs, is available with or without umbrella holder and with retro-style or circular base with a more minimalist design. The range also includes a coffee table with glass top, an ashtray stand and an umbrella stand. Ideal for public spaces in general.
