

PASSEPARTOUT Design Alberto Basaglia Natalia Rota Nodari

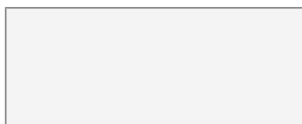

Design patent. Constructed of epoxy-coated extruded aluminium, Passepartout is a table that meet even the most diverse and sophisticated needs. Its versatility and neat design make it an ideal furnishing solution for joyful get-togethers, meetings and brainstorming sessions. The aluminium lightweight frame and joints support the top, which is positioned flush with the structure to fully conceal it and ideally create a single element. The top (10 mm thick) is available in lacquered glass or HPL. Ideal for public areas, residential and working environments.
