

SMART TABLE Design Alberto Basaglia Natalia Rota Nodari

Smart is a compact, high-density stacking table that provides the ideal solution for multi-purpose use in conferencing, meeting and training facilities, where spaces need to be arranged and rearranged quickly and easily just by one person. A thin HPL table top, a practical ABS modesty panel and a metal frame create this elegant table, whose materials have been wisely selected for being aesthetically appealing and highly impact and scratch resistant. Smart features a wide range of colour options to tickle the fancy of designers and architects in their interior design projects, as well as functional accessories such as a trolley for easy transportation and storage of the tables and a linking device to connect them to each other.
