

BUSY CHAIR Design Alberto Basaglia Natalia Rota Nodari

Equipped with a seat with a 'polka dots' pattern, derived by subtracting aluminum circles from its surface, Busy has not only a pleasing appearance, but it is also light and easily manageable. The design of the body is conceived to prevent the stagnation of water in the case of outdoor use, greatly reducing the risk of deterioration. Innovative is the seat in printed-aluminum monocoque, whose assembly is done through a special technology that allows the winding of the sheet to the rebar. Busy is made in the outdoor version with a total varnishing of body and structure, while the indoor version has a chrome structure that matches the body by choosing among several colours.
